

Lista rezultate Index Pedigree PFT pentru vitele fatate in ferma SC Boviselect SRL in intervalul: 15.06.2013-18.12.2014

Calcularea indexului PFT pedigree (PFT_PED) se face dupa o formula simpla: $1/2$ index-ul taurului tata + $1/4$ index-ul taurului bunic matern.

Rezultatul este rotunjit. Daca index-ul taurului tata lipseste nu s-a putut calcula index-ul pedigree.

Daca index-ul taurului bunic matern lipseste s-a folosit media index-ului taurilor bunici materni folositi in acel efectiv.

Tipul index-urilor folosite se indentifica prin:

G – Index genomic convertit direct PFT

GM – Index genomic convertit prin sistemul international MACE (convertirea se face in PFT prin intermediul INTERBULL)

MA – Index international convertit prin sistem MACE (convertirea se face in PFT prin intermediul INTERBULL pentru taurii testate prin fiice)

AVG – media index-urilor taurilor bunic matern din efectiv

* - index PFT
